

Flutter Developer Intern (m/f/d)

We at FYT are looking for a Dart/Flutter Developer Intern to support us in building the fastest & most intuitive personal and professional development app. We combine scientific psychometric assessments and machine learning into highly scalable online services and mobile apps. You will be part of an exciting team responsible for developing our cloud-based tribe platform, as well as rapid prototypes and proofs of concept.

Challenges the team will be working on

- Improving the customer experience by implementing new features
- Optimizing the app performance

What you will do

- Implement new features in our App version using Dart and Flutter, e.g.
 - Analytics
 - User Management
 - Activity Feed
- Work closely together with other experienced developers to create new components and features
- Implement new cool features to optimize UX and conversion rates
- Draft architectural decisions together with our Tech Lead and explore new technologies
- Have a direct impact on team processes by regular agile retrospectives

Who you are

- You are proficient in App development and coding in Dart/Flutter
- You have a good understanding of scalable code development
- You write well-structured, efficient, and maintainable code
- You have excellent analytical and problem-solving skills

Benefits

- Start-up flair & Super nice team
- State-of-the-art technology & Flexible working hours
- \$\$\$

FYT is a bootstrapped Startup with a portfolio of innovative new services that are reaching early-stage adoption. You are a self-starter capable of planning and implementing great online experiences, and interested in expanding your skills further. Our team includes senior developers and business leaders with a strong network of future opportunities. Interested? Let's get in touch -> flutter@fyt.one
