- **Standort:** Hamburg, Deutschland
- **Startdatum:** Ab sofort

Working Student Data Integration Manager (m/f/d)

Germany, Hamburg

Here at Fashion Cloud, we transform the fashion industry and support our customers through our solid base of software products. We are looking for a data integration manager to help us grow and maintain our web platform.

What it is about

At the heart of Fashion Cloud is fashion brand data: Photos, product descriptions, product attributes and much more. As a working student in the Data team, you will ensure that our customers always have the most up-to-date data available for retailers. This means that you will help them with the data transfer, support the data team with the clean integration of the data and stay in touch with the customers about the status quo. So a more technical role awaits you, which also requires communication with our customers. If other projects keep the data team busy or if there are other tasks around the data, you are the helping hand. Along the way, you can experience the day-to-day business of a scale-up and help out in other areas so you get to know what our other teams and colleagues do all day.

What awaits you

- You will be part of a fabulous team in both Hamburg and Amsterdam, and support our data team in the daily business
- Quality over quantity! The data you process will be shown on Zalando, Wehkamp, Otto and other big platforms. You will help with quality

- management on our database & platform and continuously improve data quality together with your colleagues.
- You interface in all directions - internally mainly with the account managers who bring new clients on board, and externally with our clients to help them integrate their data on our platform.
 - You make the customers' data e-shop-ready. Turning the color "ocean" into "blue", "fire red" into "red" - you translate customer data into our language by shining in writing code with your Basic JavaScript skills.
 - Category trees, data standards... You will also work side by side with our Data Integration Managers on other projects and tasks, taking the full learning curve with you.
 - We say: working students = employees. You are a full part of the team and will be integrated in the best way - look forward to great team events & other benefits, which you can find on our team page! Who knows - if it's a good fit, we're also always happy for you to start your career after you finish your studies.

What you need to bring with you

- A valid certificate of enrollment.
- Structure, independence and reliability are an integral part of your DNA.
- Your middle name is Sherlock Holmes - because as soon as something looks unusual or errors have crept in somewhere in the database or on the platform, you take the magnifying glass in your hand and find the culprit. Because you can think analytically! You have a positive attitude and a communicative streak - even if you have to chase a customer here and there.
- You bring along a good portion of data affinity and Excel is your faithful companion to live it up. As mentioned above - you optionally already have some experience or an interest in coding with JavaScript, which you can apply in a small way in our data area.

- You have a good understanding of spelling and an adequate expression in English and either German or Dutch.
- Ideally, you have already had a look around in an "e-commerce" company and are keen to get a taste of the start-up world.
- First experiences with databases would be a benefit, but this is absolutely not a must.
- You laugh. Several times. Daily.

What Hanna / Evelin says!

If you want to get an idea of what your data team colleagues are up to every day, listen to the podcast in which our Data Integration Manager Hanna talks about everyday life at Fashion Cloud:

Why you should come on board

We have a humorous mix of developers, fashion lovers and other geniuses working together. You'll have all the freedom you need to apply your know-how and help Fashion Cloud continue to grow like crazy. Along the way, you'll get a glimpse into the world of a young company on a growth trajectory and experience that steep learning curve everyone's always talking about...

P.S. We're totally committed to what we're doing and go to work every day with a lot of joy. That rubs off - believe it or not. If you have relevant references that you feel are essential to your application, please feel free to attach them to your resume.

We also care about the health of our colleagues, which is why we offer you...

- Access to nilo.health, a tool for mental health (meditation, 1:1 sessions with experts, etc.)
- Urban Sports Club or Classpass membership

If you have any relevant references that you consider essential for your application, please attach them to your CV.

Your application will be processed in accordance with our [Applicant Privacy Policy](#).

Not your dream job? Then take a look at our other vacancies [here](#) - maybe there is something suitable for you. And if you still have questions, have a look at our [FAQs for applicants](#) where you'll find answers to many of your questions regarding your application at Fashion Cloud.
